

| SKIN DEFENSE SYSTEM |

Skin Defense

- ① Cleanser | ② Toner | ③ Booster |
- ④ Ampoule | ⑤ Leave On Masque

Characteristics of sensitive skin
Clinically 10 - 20% of the population
are affected!

*Ever increasing Pollution, Stress, etc., all lead to a
higher prevalence of self-declared sensitive skin

**PRESERVES
& REPAIRS
THE SKIN
BARRIER**

External characteristics:

- Reddening
- Swelling
- Scaling
- Tendency to eczema

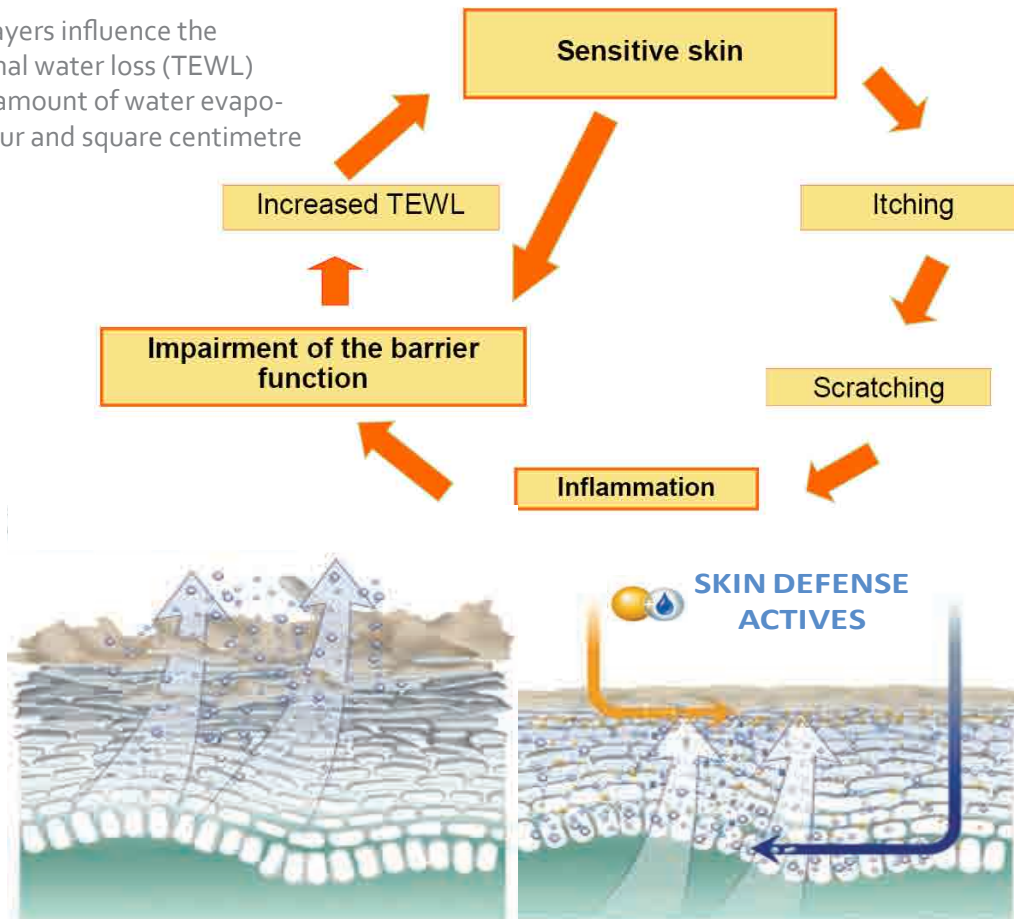

Internal characteristics:

- Tingling
- Burning
- Itching
- Sensation of tightness

Skin Defense System stops the vicious circle of inflammation

The barrier layers influence the transepidermal water loss (TEWL) which is the amount of water evaporating per hour and square centimetre of skin.

**SKIN
DEFENSE
SYSTEM-**
preserves
& repairs
the skin
barrier

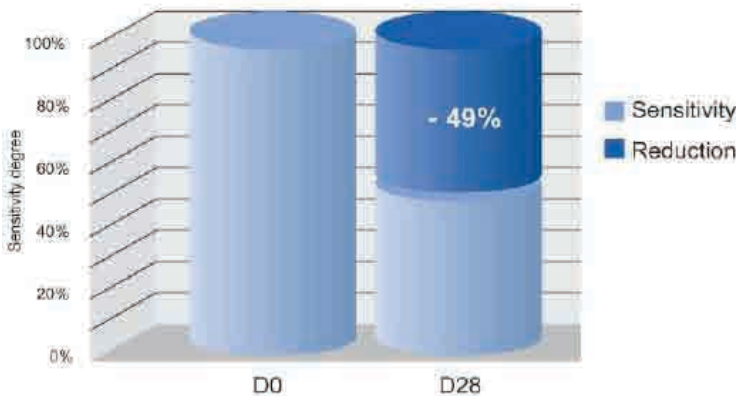

| SKIN DEFENSE SYSTEM |

1. Cardiospermum acts against itching and allergic skin rashes. It harmonises and protects irritated skin.
2. Through the stearidonic acid fraction of echium oil, DEFENSIL® has an anti-inflammatory effect and strengthens the skin barrier.
3. Non-saponifiable fractions of sunflower oil contribute valuable building-up substances such as phytosterols, tocopherols and squalene.

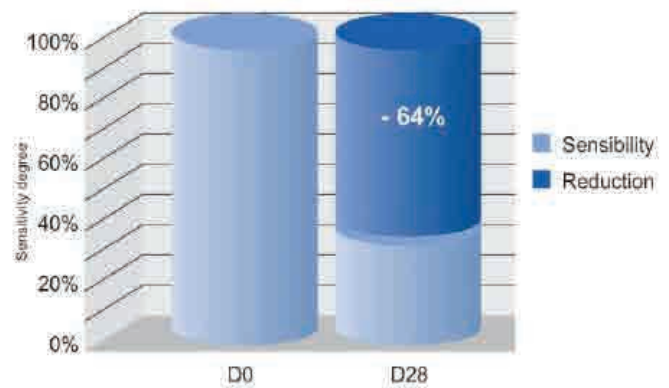

Studies of efficacy

Average reduction of skin sensitivity from D0 vs D28 using DEFENSIL®

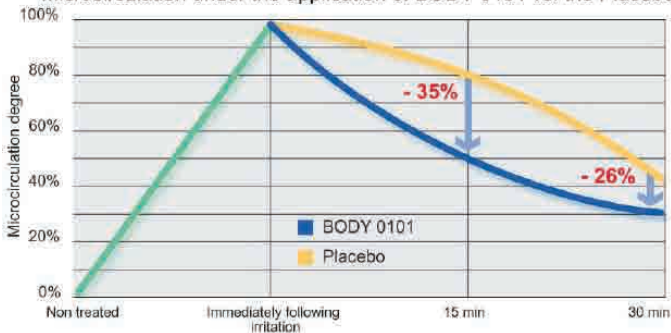

Normal skin - 45% reduction in skin sensitivity

Reduction in the degree of irritation for highly sensitive volunteers from D0 vs. D28 using DEFENSIL®

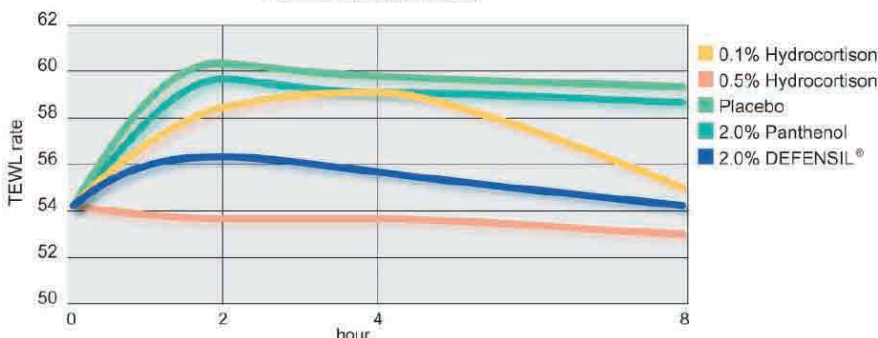

Sensitive skin - 64% reduction in skin sensitivity

Microcirculation under the application of BODY 0101 vs. the Placebo

Skin Defense system shows an immediate effect and reduces skin reddening significantly!

TEWL measurement

Skin Defense system protects the skin barrier effectively!

An increased TEWL means that there is a lack of barrier substances and that the skin is drying out due to humidity loss.

Thus, micro organisms as well as other substances may easily penetrate into the skin and the risk of irritations, allergies and inflammations caused by external influences increases.

Skin Defense system protects the skin barrier effectively! Reduces skin reddening significantly and immediately, while having a high reduction in skin sensitivity.
