

ALL BUSINESSES MANUFACTURING INDUSTRIAL COMMERCIAL RETAIL

\$0 Upfront Solar On Your Roof (or special mount)

-Immediate savings on your companies electricity bills

-Repayments usually fully tax deductible - Ask your Accountant (Funded by your power company from generated savings)

Why Finance? (Retain your cash flow!)

The major reason why many businesses don't install energy saving equipment on their premises is due to the large upfront cost of the solutions themselves.

So we have teamed up with industry specialists to provide our customers with a financing plan that lets you install a range of energy saving solutions, without a large upfront payment while letting you enjoy immediately a much lower electricity bill

HOW DOES IT WORK

Once installed, your lower energy bill plus the operating lease payments are in **MOST** cases **LESS** than your **CURRENT** electricity bill.

You can pay the system off over time – from 2 – 7 years (just like your vehicle or mobile phone).

This way, you usually start saving from the day that the system is installed.

So now you can get the benefits of **GREATLY REDUCED** electricity bills for **\$0 UPFRONT**.

NO COSTS UPFRONT, so get started today.

No obligation audit and assessment provided
