

H HARVEY PRESTIGE DESTROYS POWER BILL

Project Requirements

H Harvey's Prestige, the only Lexus & Mercedes-Benz Authorised Autobody Repairer on the Gold and Tweed Coasts, state of the art facility in Upper Coomera, decided to eliminate as much as possible of their power bill, and protect against power outages.

This is how they did it

H Harvey's Prestige installed a 100kW state of the art "Grid Tie Solar System" with battery backup, which will reduce Harvey's power bill by up to 95% and allow the business to continue to operate during times of power outages / blackouts.

Product Quality

Using only "Tier One" high performance products produces the optimal results required for projects like this. All products used come with comprehensive product guarantees and the panels with an additional 25 year performance warranty.

The Battery Backup System, cuts in during power outages allowing H Harvey Prestige to operate their lighting, office, computers, and communications whilst other business's grind to a halt.

**Renewable Energy
Specialists**

HOW CAN I DO THIS?

SMARTCOM CONSULTING WILL ASSIST YOU TO.....:

1. Evaluate your Requirements

We will analyse your current and future energy usage and what can be replaced by Solar Power and or other Renewable Power options & solutions and the savings available to your business.

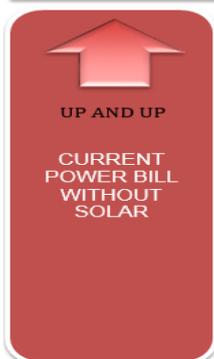

2. Providing a Quote or Going to Tender

Our team will provide a custom quotation or create and manage a tender for a renewable energy system. Once selected we will, create & manage the installation plan and permissions required.

3. Build and Manage the Project

Smartcom will manage the project from start to finish using the selected specialist commercial solar installation company.

OWN IT VIA SAVINGS GENERATED
