# What We Do

SmartConsult use sophisticated software systems and analytical tools to analyze your interval data and consumption profile to provide you with a renewable energy solution for your business.

## 1. Evaluation

We will conduct a comprehensive assessment of your current and projected energy usage and advise on what savings are available to your business from Solar Power or other Renewable and energy reduction solutions.

---

*“Slashing our Power Bills was a Must for our Business.” — Gary Brodie  
SmartConsult Provided the Solution!*

---

## 2. Provide a Quote or Conduct a Tender

Our team will create a custom quotation for you to choose from and if accepted create & manage the installation plan and permissions required.

We can also provide a ZERO Dollars Upfront finance package Installation, which removes the reason as to why businesses’ don’t install solar power, caused by the large upfront cost of the solutions themselves. Smartcom have teamed up with industry specialists to provide our customers with a financing plan that lets you install the solution for ZERO dollars upfront while letting you enjoy a much lower electricity bill.

### HOW DOES THIS WORK

Once installed, your lower energy bill plus the operating lease payments are in **MOST** cases **LESS** than your **CURRENT** electricity bill, demonstrated by a savings and Return on Investment spreadsheet. The Operating Lease Payments are in most cases **100% TAX DEDUCTIBLE**

### WE CAN SHOW YOU HOW

**Just send a copy of your electricity bill and we’ll provide you with a detailed evaluation of the cost benefits and savings available to your business.**

## 3. Build and Manage the Project

SmartConsult use specialist commercial solar installation companies, depending on the size and complexity of the project. Past projects include, Manufacturing, Industrial Buildings, Mechanical Workshops, Motels, Hotels, Farms, Local Council / Government, Roadhouses, Garden Centres, and many other types of business.

Should your electricity authority refuse the size of system that your business requires, Our Solar Specialists can also offer our Limited or ZERO Feed-IN solution which allows your business to have the solar system that you need to slash your costs.

# Solar Solutions Work

## What our Clients Have Achieved

172kW Solar System

**Extrusions** brief to **Smartconsult** was:

- Eliminate the vast majority of their monthly power bill
- Provide protection against future power price increases
- Create a sustainable long term power replacement solution
- Meet their investment criteria for the system to be paid off in under 3 years
- Allow for an Uninterrupted Power Supply “UPS” to allow the business to continue to operate during times of power outage / blackouts
